 YARMER  
YARMER MADENCILIK İNŞAAT SAN.TİC.A.Ş

*Natural Quality*

## Corporate

Located at Bedel village in Yıldızeli, Sivas, Yarmer was established in 2003 as travertine quarry. YARSTONE is our brand name for our travertine and currently it is under production with three color variations: Yarstone light, Yarstone Medium, and Yarstone Noche.

With using the latest equipment in our quarry, Yarmer extracts over 20,000 m<sup>3</sup> annually. Due to the high quality of our travertine, there has been a big demand to our products both internationally and domestically.

Our quarry is located 42km from Sivas and 550km from the Mersin Port and maintaining ecologic equilibrium is our first priority.

Using the latest equipment in our quarry, Yarmer yields over 20,000 m<sup>3</sup> of stone annually.

### Why YARMER defferent ?

Customers, both international and domestic, love us for the high quality of travertine

Higher density, compared to similar travertine

Contains no destructive minerals that affect color negatively

Low defect rate, and very easy for manufacturers to process

Both vein cut and cross cut styles in custom dimensions

High quality, color and exceeding health standards, Yarstone is globally appreciated

## Factory

### Slab Production Factory

Both the domestic and international market were recognized the quality of YARMER's Yarstone travertines and have been demanding quality and perfect finished product supply; therefore, in 2013, we built 1400 m<sup>2</sup> closed slab production and processing area near our travertine quarry with high tech PEDRINI brand machines with annual plate production capacity of 180,000 m<sup>2</sup>. Our team consists of qualified and experienced professionals.

### Sizing Processing Plant

In 2011 the newly established modern in our factory all sizes and operations will machine park-sized processing factory more travertine quarry issued but for sales in the appropriate size without blocks and debris by processing furnace efficiency increases.

In this plant;

With 64 cm width and lower sub-product size groups;

Honed,

Polished

Filled

Antiquing

Edge shading

Brushed

Procedures can be applied perfectly.

Our Sizing factory has a production capacity of 120,000 m<sup>2</sup> annually.
